

SmoothBand

A BETTER PATIENT ID SOLUTION WITH HEALTHLINKSOLUTIONS & XEROX

EFFICIENT | SAFE | CLINICALLY EFFECTIVE

The SmoothBand by HealthLink Solutions was designed to provide a replacement for all laser-printed wristband combination sheets

NEW TECHNOLOGY

The SmoothBand wristband provides a softer and more comfortable feel. A special coating is applied to the wristband to ensure that patient information and barcode are smudge and smear resistant.

EASY TO ASSEMBLE

The SmoothBand can be immediately secured to the patient. Simply remove the wristband from the sheet and apply.

NO IT RESOURCES NEEDED TO IMPLEMENT

The SmoothBand is available in different sizes and styles for every patient that you treat. From newborns to bariatric patients, we have the solution for the most complex organization. Available as a combination sheet consisting of 1 wristband and 20 label stickers.

XEROX CERTIFIED & APPROVED

The SmoothBand patient identification wristband and hospital labels can assist in patient identification to ensure every patient, drug, sample or blood unit is safely and properly identified through the hospital experience. SmoothBand provides instant identification of patient information.

From wristbands to privacy notices to consent forms— all can be printed on one Xerox device at the same time. The SmoothBand has been tested, certified and approved on a wide range of Xerox devices.
